Re: Case# 20111207001

As requested a preliminary examination of specimen Q-1 was done by this laboratory on 11 December 2011. Examination of specimen Q-1 revealed a colorless, clear liquid of low viscosity. Q-1 also had an odor of unknown origin. The unidentified liquid is possibly a low molecular weight organic compound.

Specimen(s)	Compound(s)	Technique(s)
Q1	Organic	Organoleptic
Q1	Clear liquid	Visual Inspection
